

KIKU®

The apple with the honey heart

In 1990, a South Tyrolean apple expert on a trip to Japan roamed through the plantations and discovered the KIKU®, a natural mutation of the Fuji, on a branch. Today, connoisseurs are seduced by the bright red color and the fresh, sweet taste. A crisp, juicy apple with a good shelf life. And best of all: its honey heart, the flavor kick that only the KIKU® offers.

Sweetness

acidic 9.5° Brix sweet 16° Brix

Pulp firmness
